DETAILED ACTION

Specification

Applicants are suggested to update the continuation data in the specification.

Claim Objections

Claims 1-20 are objected to because of the following informalities: on the line next to the last line of claim 1, "grip" is a misspelled word. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/872,642. Although the conflicting claims are not identical, they are not patentably distinct from each other because the conflicting claims also disclose a process of isomerization of the same feed in the presence of the same catalyst. The difference is that the

Art Unit: 1764

present claims do not include step of reforming and combining of streams as in the conflicting claims. However, the present process does not exclude these steps.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
